# CHIMA ORJI

## SOFTWARE (WEB) DEVELOPER

### WORK EXPERIENCE

**React Developer** | **Insure Tek** | Feb 2022 – now

- Implemented their UI design into reusable React components and displayed their analytical & telemetric data from their database in mostly table formats.
- Enable the company to receive real-time notifications from their clients when they send filled forms, captured & uploaded photos of new incidents to be reviewed and addressed by the company. Improved the potential of this company’s business as they will be able to handle more clients **effectively** and **efficiently** online.
- This app will enable the company receive alerts from any where in the world because business is now automated.
- Tools used: React, Redux, the Euka-datatable library, WebRTC.

**Web Developer** | **D-GIFTED MINDS** | Jan 2021 – now

- Single-handedly designed the UI/UX of their official website from scratch using Figma.
- Implemented the UI design into web pages code using HTML, CSS, Sass, JavaScript.
- Built their backend & database system using Node/Express, MongoDB.
- Improved the ease of their students’ registration & access to their information on the website by **50%**

**UI Developer/Designer** | **ATA BILISM** | Jul – Aug 2021

- Improved the UI of their client website by **100%** by fixing specific issues like contrast, visibility, visual hierachy.
- Designed their client’s website with Figma and developed them with HTML, CSS, Sass, JavaScript.
- Improved the readability and maintainability of their codebase by refactoring their HTML/CSS code.

**Programming Lab Assistant** | **EUL, LEFKE**  
Feb – Mar 2020

- In my 3rd year in the Univeristy, I was employed by the University to teach the Foundations of Programming course using the C programming language to 1st year students.

### EDUCATION

#### BSc. Computer Engineering

European Univeristy of Lefke.

LEFKE, NORTH CYPRUS.

Oct 2017 – Aug 2021

### MY SKILLS

#### Programming Languages

JavaScript, TypeScript, Python, C, C++

#### Frontend Technologies

HTML, CSS, Sass (SCSS), JavaScript

#### Libraries and Frameworks

React, Redux, Next.js, Node.js, Express.js

#### Tech Stacks

M.E.R.N

#### Design Skills

UI/UX Design, Prototyping, Wireframing, Figma, Graphics Design

#### Currently Learning

React Native, Docker, Kubernetes, VueJS, Tailwind CSS.

### CERTIFICATIONS

#### Google UX Design Foundations

[View this certificate](#)

### UNIVERSITY COURSEWORK

- Data Structures
- Analysis of Algorithms
- Software Architecture
- Digital Logic Design
- Operating Systems
- Microprocessor Systems
- Web Development

### MY BIGGEST PROJECT

#### Helomi

- Helomi is a MERN fullstack web-based single-page chat app.
- It enables users to signup, login, find and add friends, send text messages and make peer-to-peer video calls with one another at real-time with the big help of web sockets.
- It also allows users to update their profile picture.
- It is designed & built with Figma, React, Redux, Node, Express, MongoDB, Socket.io and WebRTC.
